

### **3073 - Audience Summary**

The course is designed for those who already have experience with Linux, including general system configuration and command line work. The course is also ideal for those seeking advanced administration skills on SUSE Linux Enterprise Server 10, those who have completed the previous two courses in the Novell CLP 10 curriculum, and those preparing to take the Novell CLP 10 Practicum.

### **3073 - Course Prerequisites**

This course is designed for students who have intermediate level knowledge of Linux. They should be able to:

- Understand what Linux is and know about the OpenSource concept
- Perform a basic installation of SUSE Linux Enterprise Server 10
- Perform a basic system configuration including network setup
- Manage software packages
- Work on the command line including file management and text editing

This knowledge can also be gained through the SUSE Linux Enterprise Server 10 Fundamentals (Course 3071) and SUSE Linux Enterprise Server 10 Administration (Course 3072).

### **3073 - Course Outline**

This course covers many topics, many of which are listed below:

- Managing Virtualization with Xen
- Configuring a Web Application Server
- Configuring and Using Samba
- Enabling Fundamental Network Services
- Creating Shell Scripts
- Compiling Software from Source
- Performing a Health Check and Performance Tuning
- Managing Hardware Components
- Preparing for the Novell CLP 10 Practicum

### **3073 - Course Testing Information**

This course along with the skills taught in SUSE Linux Enterprise Server 10 Fundamentals (Course 3071) and SUSE Linux Enterprise Server 10 Administration (Course 3072) prepares you to take the Novell CLP 10 Practicum Exam. (050-697).
