

### **3086 - Audience Summary**

This course is addressed to those familiar with Windows Desktop (e.g. Windows XP) as user or administrator and who now want to gain in-depth knowledge on tasks a Linux system administrator has to perform routinely on SUSE Linux Enterprise Desktop 10.

### **3086 - Course Prerequisites**

Before attending this course you should be familiar with a Windows desktop. Linux knowledge would be a plus, but is not a prerequisite, as the course covers basic Linux knowledge, like files and file system layout, user management, how to use the shell and basic functionalities of YaST.

### **3086 - Course Outline**

This course covers a wide range of subjects, many of which are covered below:

- Install SUSE Linux Enterprise Desktop 10
- Use the Linux Desktop
- Locate and use Help Resources
- Administer Linux with YaST
- Manage the Network Configuration
- Manage Software
- Manage Directories and Files
- Work with the Linux Shell and Command line
- Manage Users, Groups and Permissions
- Monitor the Linux Systems and Control Processes and Services
- Manage System Initialization
- Administer Printing
- Integrate SUSE Linux Enterprise Desktop 10 into existing environments
- Customize the Graphical Interface on SUSE Linux Enterprise Desktop 10
- Deploy SUSE Linux Enterprise Desktop 10

### **3086 - Course Testing Information**

This course prepares you to take the Novell Certified Linux Desktop Administrator 10 (Novell CLDA 10) certification exam (050-708).
