

## Key Objectives - 3104

---

During this course, you will learn how to:

- Install and configure the SUSE Linux Enterprise Desktop
- Change the Linux Desktop Graphical User Interface (GUI)
- Lock down and secure the Linux Desktop
- Configure Networking settings
- Integrated Linux Desktops into various OS environments
- Create basic shell scripts for desktop administration and management

## Audience Summary

---

This course is for people with basic Linux administration knowledge (such as gained in the CLA 11 certification) and now want to gain in-depth knowledge on administrative tasks routinely performed on SUSE Linux Enterprise Desktop 11.

## Course Prerequisites

---

Before attending this course you should be familiar with the Linux administration (as found in *SUSE Linux Enterprise 11 Fundamentals* and *SUSE Linux Enterprise 11 Administration*). You should also be familiar with a Windows desktop.

## Course Outline - 3104

---

This course covers many topics, many of which are listed below:

- Customizing the graphical interface of the SUSE Linux Enterprise Desktop
- Locking down the SUSE Linux Enterprise Desktop
- Using the NetWorkManager to configure the network
- Activating and using IPv6
- Integrating SUSE Linux Enterprise Desktop into an Active Directory environment
- Integrating SUSE Linux Enterprise Desktop into an eDirectory environment
- Integrating SUSE Linux Enterprise Desktop into a UNIX environment
- Accessing remote desktops
- Using multimedia on a SUSE Linux Enterprise Desktop
- Configuring email
- Creating shell scripts
- Deploying SUSE Linux Enterprise Desktop
